Please follow these instructions:

Download the zip file located here:
http://www.newbedfordschools.org/UserFiles/Servers/Server_66938/File/Departments/Technology%2
0Services/cert2019.ZIP

Extract the certificate file to the desktop.

Double click to open the certificate file. Click Install Certificate:

Check off Local Machine and click next. If local machine is unavailable, proceed with Current User.

← 🎫 Certificate Import Wizard   ✕

Welcome to the Certificate Import Wizard

This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.
A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.

  ◉ Local Machine

To continue, click Next.

🛡 Next   Cancel

Click the Place all certificates in the following store, select Trusted Root certification authorities, click ok and click next.
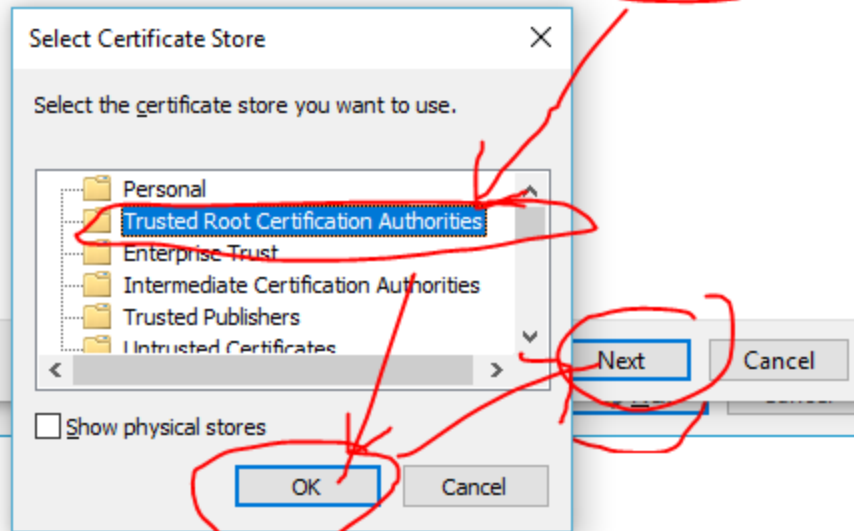

← 🖥 Certificate Import Wizard

Certificate Store
Certificate stores are system areas where certificates are kept.

Windows can automatically select a certificate store, or you can specify a location for the certificate.

○ Automatically select the certificate store based on the type of certificate

◉ Place all certificates in the following store

Certificate store:

[   ] Browse...

Select Certificate Store   ✕

Select the certificate store you want to use.

- 📁 Personal
- 📁 Trusted Root Certification Authorities
- 📁 Enterprise Trust
- 📁 Intermediate Certification Authorities
- 📁 Trusted Publishers
- 📁 Untrusted Certificates

☐ Show physical stores

OK   Cancel

Next   Cancel

Then click finish.

After you've done this, refresh the browser. If it still looks untrusted close chrome, then reopen it.
