ACCESS TO DIGITAL RESOURCES

The School Committee supports the right of students, employees, and community members to have reasonable access to various information formats and believes it is incumbent upon users to utilize this privilege in an appropriate manner.

Safety Procedures and Guidelines

The Superintendent, in conjunction with the Director of Technology, shall develop and implement appropriate procedures to provide guidance for access to digital resources. Guidelines shall address teacher supervision of student computer or tablet use, ethical use of digital resources and issues of privacy versus administrative review of electronic files and communications. In addition, guidelines shall prohibit utilization of digital resources for prohibited or illegal activities and for the use of other programs with the potential of damaging or destroying programs or data.

Internet safety measures shall be implemented that effectively address the following:

- Controlling access by minors to inappropriate matter on the Internet as defined by the Children’s Internet Protection Act (CIPA) and the Children’s Online Privacy Protection Act (COPPA);
- Safety and security of minors when they are using e-mail, instant messaging applications, and other forms of direct electronic communications;
- Preventing unauthorized access, including hacking, viruses, and other unlawful activities by minors online;
- Unauthorized disclosure, use and dissemination of personal information regarding minors.

The School District shall provide reasonable public notice to address and communicate its internet safety measures.

Empowered Digital Use

All students and faculty must agree to and sign an Empowered Digital Use form prior to the student or staff member being granted independent access to digital resources and district networks. The required form, which specifies guidelines for using digital resources and district networks, must be signed by the parent or legal guardian of minor students (those under 18 years of age) and also by the student. This document shall be kept on file as a legal, binding document. In order to modify or rescind the agreement, the student's parent/guardian (or the student who is at least 18 years old) must provide the Director of Technology with a written request.
Employee Use

Employees shall use district email, district devices, and district networks only for purposes directly related to educational and instructional purposes.

Community Use

On recommendation of the Superintendent in conjunction with the Director of Technology, the district shall determine when and which computer equipment, software, and information access systems will be available to the community. All guests will be prompted to, and must accept the district’s Access to Digital Resources Policy before accessing the district network.

Disregard of Rules and Responsibility for Damages

Individuals who refuse to sign required Empowered Digital Use documents or who violate district rules governing the use of district technology or networks shall be subject to loss or restriction of the privilege of using equipment, software, information access systems, and network.

Individuals shall reimburse the district for repair or replacement of district property lost, stolen, damaged, or vandalized while under their care.

EMPOWERED DIGITAL USE POLICY

Purpose

The School Committee recognizes the need for students to be prepared to contribute to and excel in a connected, global community. To that end, the district provides ongoing student instruction that develops digital citizenship skill sets for using technology as a tool. Information and communication technology are an integrated part of our curriculum across subjects and grades in developmentally appropriate ways and are aligned with the Massachusetts Curriculum Frameworks and standards, including seeking knowledge and understanding; thinking critically and solving problems; listening, communicating, and interacting effectively; and engaging and competing in a global environment.

Availability

The Superintendent or designee shall implement, monitor, and evaluate the district’s system/network for instructional and administrative purposes.

All users shall acknowledge that they understand that using digital devices, whether personal or school owned, and the school district network is a privilege and when using them in accordance with School District guidelines they will retain that privilege.

The Superintendent or designee shall develop and implement administrative guidelines, regulations, procedures, and user agreements, consistent with law and policy, which shall include but not be limited to the following:

- Digital devices, software, and networks shall be used in school for educational purposes and activities.
- An individual’s personal information (including home/mobile phone numbers, mailing addresses, and passwords) and that of others shall be kept private.
- Individuals will show respect for themselves and others when using technology including social media.
- Users shall give acknowledgement to others for their ideas and work
- Users shall report inappropriate use of technology immediately

These procedures shall be reviewed annually by district administration together with students and teachers and shall provide a springboard for teaching and learning around topics such as internet safety, digital citizenship, and ethical use of technology.
